

## Mayank Tomar

Founder & CEO

---

- Budding Blockchain Developer.
- 6+ years of IT experience.
- Passionate about Blockchain & Organic Farming.

# Problem

- In agriculture, there are no reliable ways to invest.
- Farmers of organic produce have difficulty getting fair prices for their products.
- It is impossible to prove that organic products are authentic.

# Idea

- ❖ A Decentralized Application connected with IoT devices that facilitates.
  - Fractional ownership of organic produce.
  - Marketplace for the harvest.
  - Keeps track of crop health, soil health, and nutrients applied.

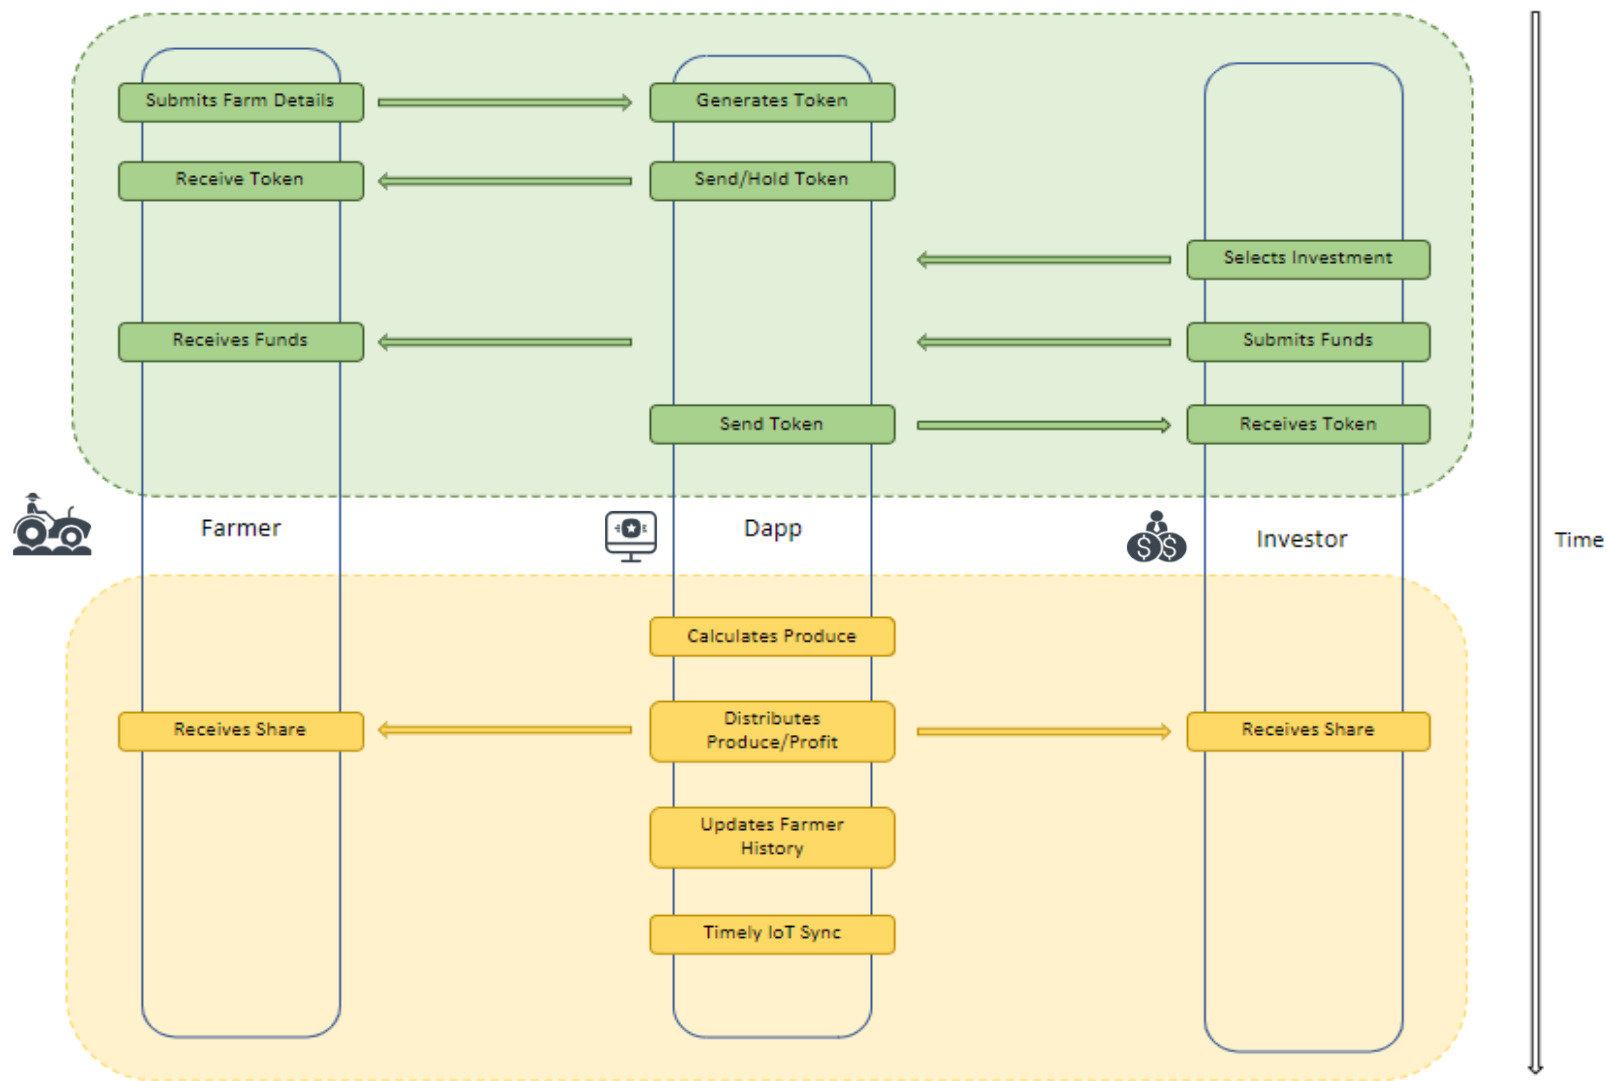

# Benefits

- Brings producer and consumer together.
- Automates tedious organic certification procedure.
- Opens transparent alternative investment opportunities.

# Interaction

# Features

- Investment as fractional ownership.
- Proves organic history of the harvest.
- A marketplace for the produce.

Tokenization
